# JASPER Differentials and Rear Axle Assemblies are Subjected to the Strictest, High-Quality Processes!

Skilled JASPER technicians who pride themselves on their attention to detail, along with in-depth inspections and adjustments, provide you with the highest quality. Add worry-free years to the life of your customers' vehicles by installing precision-built JASPER remanufactured differentials or rear axle assemblies. Install JASPER, you and your customer will know you made the right choice!

JASPER's complete line includes: GM, Ford, Dodge, Dana/Spicer, even Isuzu, Mercedes and Toyota truck applications up to 2 tons!

- During the differential remanufacturing process, JASPER has the ability to remanufacture axle ends for applications up to 1 1/2 tons.
- JASPER remanufactured differentials are inspected for correct backlash clearance to assure proper gear lubrication for reduced noise and to avoid overheating, especially in severe-duty applications.
- Tooth contact pattern is inspected and adjusted to utilize the full structure of the gear for minimum gear noise and reduced fatigue.
- Bearings are preloaded to OEM specifications for longer bearing life, smooth operation and proper break in.
- Custom remanufacturing is also available.
- JASPER also offers an additional line of Differential Products (call for availability).
  - Axle Shafts
  - Wheel Bearing Kits
  - 7.25 4WD & AWD Actuator Assemblies
